INDEX TO VOL. XVIII.

ACIDOSIS, in rabbits, 113.
ALSBERG, C. L. See FITZ, ALSBERG, and HENDERSON, 113.
Ammonium salts, cause of pharmacological action, 58.
Amœba proteus, functions and structures, xi.
Atmosphere, moist, effect on rats, 1.
AUER, J. Gastric peristalsis in rabbits under normal and some experimental conditions, 347.
AUER, J. Observations on normal gastric peristalsis in the rabbit, xi.
AUER, J. See MELTZER and AUER, xiv.
AUER, J., and S. J. MELTZER. Peristalsis of the rabbit's cœcum, xiv.
AUSTRIAN, C. R. See EYSTER, AUSTRIAN, and KINGSLEY, 413.

BENEDICT, F. G., and A. R. DIEFENDORF. The analysis of urine in a starving woman, 362.
BENEDICT, F. G., and CHARLOTTE R. MANNING. The determination of water in proteins, 213.
BENEDICT, F. G., and V. C. MYERS. The determination of creatine and creatinine, 397.
BENEDICT, F. G., and V. C. MYERS. The elimination of creatine, 406.
BENEDICT, F. G., and V. C. MYERS. The elimination of creatinine in women, 377.
BLACK, O. F. See HENDERSON and BLACK, 250.
Blood coagulation, affected by blood serum and by tissue extracts, xvii.
Blood current, velocity influenced by digitalis, strophanthus, and adrenalin, 129.
Brain injuries, effect on vasomotor centre, 181.
BROOKS, C. See MCGUIGAN and BROOKS, 256.
BROWN, E. D. See SOLLMANN and BROWN, 426.

CARLSON, A. J. On the mechanism of the refractory period in the heart, 71.
CARLSON, A. J. On the mechanism of the stimulating action of tension on the heart, 149.
Carbon dioxide excretion in moist atmosphere, 1.
Cell division, maturation, and fertilization, 89.
CHACE, A. F., and W. J. GIES. Preliminary observations on the poisonous action of thorium, 457.
CLAPP, S. H. See OSBORNE and CLAPP, 123, 295.
Cœcum, peristalsis in rabbit, xiv.
Coronary arteries, pressure in, affects heart beat, 14.
Creatine, determination, 397.
——, elimination, 406.
Creatinine, determination, 397.
——, elimination, 377.

DAWSON, J. Some physical reactions of Physa, xiii.
DELLINGER, O. P. See HODGE and DELLINGER, xi.
Diabetes, phlorhizin, influenced by mechanical energy, xii.
DIEFENDORF, A. R. See BENEDICT and DIEFENDORF, 362.

EAR, functions in dancing mouse, xviii.
EDMUNDS, C. W. The influence of digitalis, strophanthus, and adrenalin upon the velocity of the blood current, 129.
EGGERS, E. H. The rhythm of the turtle's sinus venosus in isotonic solutions of non-electrolytes, 64.
ESTERLY, C. O. The reactions of cyclops to light and to gravity, 47.
EYSTER, J. A. E. See HIRSCHFELDER and EYSTER, 222.

EYSTER, J. A., C. R. AUSTRIAN, and C. R. KINGSLEY. Concerning the effect of changes of blood pressure produced by temporary occlusion of the aorta upon respiratory activity, 413.

FAT, formation, xix.
FITZ, R., C. L. ALSBERG, and L. J. HENDERSON. Concerning the excretion of phosphoric acid during experimental acidosis in rabbits, 113.

GELATIN, sparing action, xii.
GIBSON, R. B. See MENDEL and GIBSON, 201.
GIES, W. J. See CHACE and GIES, 457.
Gliadin, decomposition product, 123.
Glycolysis, 283.
Glycosuria, mechanism of, 256.
Gravity, affects reactions of Cyclops, 47.
Growth, in partial starvation, 309.
GUTHRIE, C. C., and F. H. PIKE. The relation of the activity of the excised mammalian heart to pressure in the coronary vessels and to its nutrition, 14.

HALL, G. W. Concerning glycolysis, 283.
HALL, L. D. See KEMP and HALL, xix.
HATAI, S. Effect of partial starvation followed by a return to normal diet, on the growth of the body and central nervous system of albino rats, 309.
Heart, artificial regulation of rate, xv.
——, extrasystoles in, 222.
——, influenced by coronary pressure and by nutrition, 14.
——, refractory period, 71.
——, rhythm in isotonic solutions of non-electrolytes, 64.
——, stimulation by tension, 149.
Heat arrest of heart, 14.
HENDERSON, Y. Artificial regulation of the heart rate, xv.
HENDERSON, L. J. See FITZ, ALSBERG, and HENDERSON, 113.
HENDERSON, L. J., and O. F. BLACK. Concerning the neutrality of protoplasm, 250.
HIRSCHFELDER, A. D., and J. A. E. EYSTER. Extrasystoles in the mammalian heart, 222.
HODGE, C. F., and O. P. DELLINGER. Functions and structure in Amœba proteus, xi.

KEMP, G. T., and L. D. HALL. The formation of fat in animals fattened for slaughter, xix.
KINGSLEY, C. R. See EYSTER, AUSTRIAN, and KINGSLEY, 413.

LEE, F. S. The cause of the treppe, xviii, 267.
Light, affects reactions of Cyclops, 47.
LILLIE, R. S. Production of artificial parthenogenesis in Asterias through momentary elevation of temperature, xvi.
LOEB, L. The action of blood serum and tissue extracts on the coagulation of the blood, xvii.
LUSK, G. The influence of mechanical energy in phlorhizin diabetes, xii.

McGUIGAN, H., and C. BROOKS. The mechanism of experimental glycosuria, 256.
MACLEOD, J. J. R. Observations on the excretion of carbon dioxide gas and the rectal temperature of rats kept in a warm atmosphere which was either very moist or very dry, 1.
MANNING, CHARLOTTE R. See BENEDICT and C. R. MANNING, 213.
MATHEWS, A. P. A contribution to the chemistry of cell division, maturation, and fertilization, 89.
MATHEWS, A. P. An apparent pharmacological "action at a distance" by metals and metalloids, 39.
MATHEWS, A. P. The cause of the pharmacological action of ammonium salts, 58.
MELTZER, S. J. The failure of regeneration of the superior cervical ganglion twenty-six months after its removal. A demonstration, xiv.
MELTZER, S. J., and J. AUER. The effect of section of one vagus upon the secondary peristalsis of the œsophagus, xiv.
MENDEL, L. B. See WELLS and MENDEL, 156.
MENDEL, L. B., and R. B. GIBSON. Observations on nitrogenous metabolism in man after removal of the spleen, 201.
Metabolism, after removal of the spleen, 201.
——, sparing action of gelatin, xii.
MURLIN, J. R. The sparing action of gelatin, xii.
Muscle, Treppe, 267, xviii.
MYERS, V. C. See BENEDICT and MYERS, 377, 397, 406.

OESOPHAGUS, peristalsis affected by section of one vagus, xiv.
OSBORNE, T. B., and S. H. CLAPP. A new decomposition product of gliadin, 123.
OSBORNE, T. B., and S. H. CLAPP. Hydrolysis of phaseolin, 295.
Oxygen, resistance to lack of, affected by carbohydrates, 164.

PACKARD, W. H. The effect of carbohydrates on resistance to lack of oxygen, 164.
Parthenogenesis, affected by temperature, in Asterias, xv.
Peristalsis of stomach in rabbit, xi.
PETERS, A. W. Chemical studies on the cell and its medium. Part II. Some chemico-biological relations in liquid culture media, 321.
Pharmacological action at a distance, 39.
Phaseolin, hydrolysis of, 295.
Phosphoric acid excretion in acidosis, 113.
Physa, physical reactions of, xiii.
PIKE, F. H. See GUTHRIE and PIKE, 14.
PORTER, W. T., and T. A. STOREY. The effect of injuries of the brain on the vasomotor centre, 181.
Protein, water in, 213.
Protoplasm, neutrality of, 250.

SOLLMANN, T., and E. D. BROWN. Pharmacologic investigations on Thorium, 426.
Spleen, removal influences nitrogenous metabolism, 201.
Starvation, effect on growth, 309.
——, urine, 362.
Stomach, peristalsis, 347, xi.
STOREY, T. A. See PORTER and STOREY, 181.
Sympathetic, superior cervical ganglion fails to regenerate, xiv.

TEMPERATURE of rats in moist atmosphere, 1.
Thorium, pharmacology of, 426.
——, poisonous action, 457.

URINE, analysis in starving woman 362.

VAGUS, section affects peristalsis of œsophagus, xiv.
Vasomotor centre, affected by injuries of the brain, 181.

WELLS, H. G., and L. B. MENDEL. On absorption from the peritoneal cavity, 156.

YERKES, R. M. The functions of the ear of the dancing mouse, xviii.
